

Task List — Accountant (on joining; hiring deadline Aug 20)

August 7, 2026 · Sorted by priority.

Critical (first week)

1. **Revenue recognition policy** for annual prepayments (cash versus deferred) — the central methodological question: clients pay twelve months ahead while visits are delivered across the year. Deliver a written accounting policy aligned with the tax regime and the owner's reporting needs.
2. **Confirm the payroll gross-up.** The model carries all field salaries as net (driver-technician AMD 400K; technicians AMD 300K; light-crew AMD 450K) with a $\times 1.35$ loading. Compute the exact fully loaded cost (income tax, social payments, other charges) and return the figure for the model update.
3. **Take over the primary-document archive** from counsel (all spending to date: contractors, services) and open the books.
4. **Software subscription (USD 120/month, currently on the owner's personal card):** process reimbursement as a company expense retroactively and migrate billing to the corporate account once banking is live.

High priority

5. With counsel: the tax regime — applicability of the 10% turnover regime, the AMD 115M VAT threshold, the modeled Year-3 transition, and fiscal-receipt requirements for online acquiring.
6. Monthly management reporting mapped to financial model v6.0 (plan versus actual): revenue, gross payroll, buffers, marketing, overhead, one-time items.
7. Reserves methodology: 3% of revenue for refunds; the AMD 500K incident reserve.
8. Payroll operations before the first field day: employee registration, payment schedule, statements.

Medium priority

9. Foreign-currency settlement accounting (USD/EUR card receipts converting to AMD; acquiring fees).
10. A monthly owner report: P&L, cash position, prepayment liabilities, tax calendar.
