

Task List — Designer (contract AMD 1,000,000; ~1 month)

August 7, 2026 · Sorted by priority. Reference photographs of the emblem components (forget-me-not; Armenian eternity symbol; two open hands) and the palette (olive #5E6A3A / anthracite #33373C / warm white #FAFAF7) have been provided as direction — the designer has full creative freedom, including alternative concepts with a business rationale; **the only fixed element is the MemoryCare name.** The slogan in all layouts: "**Honoring Memory, Caring for Loved Ones.**"

Critical

1. **Vector logo** (SVG/AI plus a PNG set): color variants for light and dark backgrounds plus monochrome; legible at small sizes (favicon, uniform patch). If following the reference direction: forget-me-not with five rounded petals over the eight-blade Armenian eternity symbol, held between two open hands; detail simplification for scalability is welcome.
2. **Photo/video report template** — this is the company's product: before/after framing, date, GPS badge, visit caption, no visual noise over the photographs; variants for dashboard, email, and social. Handed to the developers for the platform.
3. **Brand book** (compact): logo and clear space, palette, typography (full support for Armenian, Latin, and Cyrillic scripts), slogan usage, tone (premium, warm, dignified — no funeral clichés), do/don't examples.

High priority

4. Field-crew uniform (shirt/vest/cap) — production-ready artwork.
5. Vehicle livery.
6. Social templates: before/after case, testimonial, seasonal post (Merelots, Easter, Vardavar), Family Circle invitation.
7. Key platform screens to the developers **ahead of** the full brand book (their 45-day build depends on it): pricing page with four products, dashboard, report view.

Medium priority

8. Business cards, letterhead, email signature.
9. Site OG images and favicons carrying the new slogan.
10. Source files (Figma/AI) delivered to the company as an acceptance condition (per contract).
